The WELL Building Standard is a set of voluntary guidelines, shaped by empirical research that can guide decision making for buildings that support humans' holistic health in lighting, air quality, sound, water quality, nutrition, community and beauty. <https://www.wellcertified.com/>

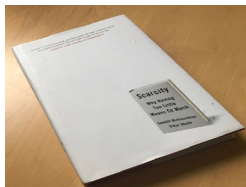

Pable, J. (2010). **The transitional homeless shelter experience.** This reports the finding of a comparative case study examining residents perceptions and satisfaction with a transitional shelter bedroom redesigned with trauma-informed design supportive features. https://drive.google.com/file/d/1gK8yHIQYLz1C5ZQhGxy_VCikgjuuilra/view?usp=sharing

Design Resources for Homelessness. This non-profit organization produces shelter case studies, research summaries and reports that detail recommendations for how to design shelters and supportive housing for specific resident groups. designresourcesforhomelessness.org

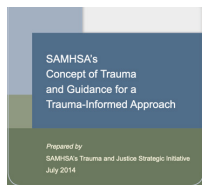

Pable, J. **TedXFSU talk** [video]. Homelessness: Supporting Dignity through Design. https://www.ted.com/talks/jill_pable_homelessness_supporting_dignity_through_design

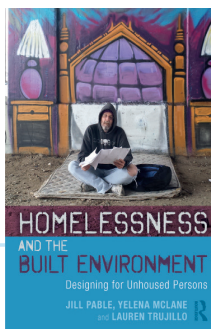

Mullainathan, Senhil & Shafir, Eldar. [book] (2013). **Scarcity: Why having too little means so much.** This book discusses being under stress and the consequences for decision-making. There are lessons here for architecture and the need for intuitive policies and building wayfinding.

Research Design Connections. This subscription website interprets the findings of research into actionable choices for building design. <https://researchdesignconnections.com/>

SAMHSA. [report] (2014). **SAMHSA's concept of trauma and guidance for a trauma-informed approach.** This report outlines the main concepts of trauma-informed care from which trauma-informed design draws its grounding. <https://store.samhsa.gov/product/SAMHSA-s-Concept-of-Trauma-and-Guidance-for-a-Trauma-Informed-Approach/SMA14-4884>

Pable, J. , McLane, Y. and Trujillo, L. [book] (2022); **Homelessness and the built environment: Designing for unhoused persons.** This book examines the contribution architecture and interior design can contribute to providing support for unhoused persons through the design process, case studies from projects around the world, and strategy recommendations for practical design interventions that support human health. <https://www.routledge.com/Homelessness-and-the-Built-Environment-Designing-for-Unhoused-Persons/Pable-McLane-Trujillo/p/book/9780367232443>
